ACTA GEOLOGICA SINICA  Vol. 95 No. 6  2021

CONTENTS

Invited Articles
Coenose surface rupture and seismic structural of the 2011-11-13 Mw=9.0 Great East Japan Earthquake—

 applicants  of the 95th anniversary of earthquake detection and forecast in China

Marie-Luce CHEVALIER, WU Kangning, WANG Peng, LIU Zhihao, CHEN Peng, LI Chuncheng

Research Article
Shallow and deep structural features and earthquake detection problems

GONG Buguang, WANG Guoqiang, CHANG Hong, ZHANG Yangfeng

Determination of the age of the Late Paleozoic basin boundary in South China

YANG Weiguo, YU Jie, LI Xinhua

Flood-dammed uplift and subsidence of the basin in the Daxingguan Mountains, Inner Mongolia, since the Late Miocene

LUO Zu, ZHENG Bo, JI Jiaxi, ZHANG Zhongchao

Late Miocene marinemargin deposits of East China Sea developed with plate subduction: constraints from detrital zircon ages

ZHANG Xiaochang, ZHU Chi, YANG Shenglin, ZHU Baoqian

Tectonic significance of Middle Jurassic granitoids in the Jingdong area, southern Sichuan Sengge mountain belt

ZHANG Yuanli, XIA Zhijun

Sedimentary sequences of middle deposits in shallow marine environment: a case study of the Yangshui section in the Yangtze River delta

ZHENG Wenchao, CHEN Chao, TIAN Yongjie, CHEN Gen

Geological characteristics and tectonic significance of the Yanfeng gold deposit, Jiaonan area

ZHANG Weifeng, LIU Yudong, LIU Yudong, LIU Guihong, ZHANG Hua, LI Jia"
